Summary

A Journalist turned product marketer with 4+ years of experience, specializing in translating customer insights into product and go-to-market strategy. Experienced in cross-functional execution, analytics-driven decision making, and driving measurable growth across digital products. Currently pursuing an MBA with specialization in Product Management.

Professional Experience

Data Analyst <i>Meta - Remote</i>	Feb 2026 – May 2026
- Analyzed AI model outputs to identify error patterns and improve WhatsApp bot quality and safety signals. - Identified model error patterns, documented findings, reducing annotation ambiguity across the reviewer team. - Created Python scripts to automate repetitive annotation correction, leading to improved team output by over 50%.	
Product Marketing Specialist <i>Costar Imports - San Jose, CA</i>	Feb 2023 – Jan 2026
- Worked with a dedicated sales representative to create an internal product roadmap, product requirements collected from the latest market trends, and jewellery customers across the country. Developed product documentation, product narratives, and go-to-market strategy. - Converted customer research and data, market research, and quantitative behavioral data into roadmap recommendations, driving a 30% lift in jewelry design performance. - Drove feature requirements for design and engineering that made online customer access better. Worked with customers with a total revenue of \$5M. Focused on improving revenue generation. - Acted as a customer support to resolve issues across different domains, such as intricate design issues. - Represented the company at America’s largest jewelry (JCK Expo), capturing customer insights and identifying new market opportunities that expanded the customer base. Understood design KPIs in real-time. - Worked with the production factory to improve jewellery design processes and acted as a bridge to customers.	
Marketing Manager <i>She and India (SAI) - New Delhi, India</i>	Mar 2020 – Jul 2021
- Generated \$25K in donations through targeted user segmentation and campaign optimization. - Improved donor retention by refining outreach strategy using behavioral data insights. - Built scalable communication systems across 3 teams to improve campaign execution. - Led “Feminine Hygiene” project by conducting seminars in rural India.	
News Anchor & Video Journalist <i>GoNews India – Delhi-NCR, India</i>	Apr 2019 – Nov 2020
- Anchored stories from all genres increased viewership by 25% in four months. - Performed market analysis and analyzed customer experience, which made me simplify complex policy, tech, and economic topics into clear narratives for a national audience. - Boosted audience engagement by 20% by testing & iterating content formats with cross-functional teams. - Refined reporting strategy using analytics and audience feedback in a fast-paced environment.	

Projects

Bloom Better, AI Postpartum Support Platform (MBA)
- Built an AI-powered postpartum support platform with chatbot and clinical resources; defined product requirements and validated with OBGYNs. - Defined product requirements, user flows, and feature scope; backend deployed on Railway. Pursuing sole IP ownership with the intent to scale commercially.
Product creation - Market place simulation (MBA)
- Created a virtual carbon fiber bike company from the ground up, from designing bikes to taking it to market. - Made critical financial, design, advertising, and expansion decisions after analyzing market trends, user research, user experience, competitors' strategies, and an action plan, the ad game. - Initially positioned as a higher-end company, we eventually decided to pivot to a more affordable brand, winning the largest market share and being the most profitable company.
Agentic AI Automation Suite (MBA)
- Built 4 autonomous AI agents over 2 weeks: LinkedIn content generation & publishing, expense claim processing, office hour scheduling, and a long-form video-to-short-form pipeline. - Video repurposing agents expanded content reach by 10K+ across platforms.
Financial Analysis of Costco & Delta/Northwest Airlines Case Study (MBA)
Conducted ratio, cash flow, and benchmarking analysis of Costco to deliver data-backed investment recommendations; separately assessed covenant breach risk in Delta's Northwest acquisition.
